# THE ALL-NEW VOLVO V70

When the Volvo Duett arrived in 1953, there was nothing like it. It created a category all its own; the multi-purpose estate. Improved and refined year after year, this is the 10th generation of our Swedish herrgårdsvagn (estate car) and it defies comparison yet again. There's more luxury here, more onboard intelligence, more practical space and more of what we're known for and proudest of – safety. What's more, our dedication to safety is what promotes a joy of driving found in no other car. This is original thinking at its best.

## T6 AWD

The 3.0 litre, turbocharged, in-line, 6 cylinder engine delivers outstanding performance – producing 285 PS and 400 Nm torque. This powerful engine features a responsive twin-scroll turbocharger designed to provide extremely swift response at all engine speeds. The turbocharger takes exhaust gases in two stages, with the in-flow divided into two lots of three cylinders each. The standard Geartronic transmission features a sport mode providing the option of faster gear changes and holds gears for longer to transmit power efficiently to an AWD system with Instant Traction™ fitted.

### V70 SE

The SE aims to spoil. Its luxurious interior boasts supportive seats with Sundby Textile/T-Tec upholstery – electronically adjustable for the driver. Then there's the 8 speaker High Performance audio system with 160 W output and intuitive features such as automatic rain sensor and autodimming rear view mirror. On the outside, 17" Spartes alloy wheels and colour co-ordinated front spoiler and side mouldings make sure your presence doesn't go unnoticed.

- (i) For best performance and lowest fuel consumption 98 RON is recommended, 95 RON can be used for normal driving.
- (ii) The results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model.
- (iii) The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.
- (iv) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 700 kg.

**Notes**

The weight of the vehicle will influence the level of CO<sub>2</sub> emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO<sub>2</sub>. Once a vehicle has been built it will be given its own specific CO<sub>2</sub> emission on which Vehicle Excise Duty will be charged.

A weighbridge must be used to determine specific weights.

Data valid for manual transmission unless specified.

Gt = Geartronic Automatic Transmission.

All measurements in mm.

The Max. output figures are quoted in PS (Pferdestärke), which is the metric equivalent of brake horsepower.
